PROFESSIONAL SUMMARY

Systems Engineer with 6+ years building production software. I specialize in backend development with Node.js, NestJS and TypeScript: REST API design, modular architecture and asynchronous processing with message queues. I work with AWS infrastructure, Docker containers and CI/CD pipelines, and also deliver frontend work with Angular and Vue when a project calls for it. For four years I was my team's technical reference, with autonomy over architecture decisions and responsibility for critical production incidents.

TECHNICAL SKILLS

Backend: Node.js, NestJS, TypeScript, JavaScript, Express. REST APIs, modular architecture, DTO validation, token-based authentication. Swagger for API documentation. C# / ASP.NET Core.

Messaging & async: RabbitMQ, AWS SQS, BullMQ. Event-driven architecture, queue-based processing and state control across long-running workflows.

Cloud & DevOps: AWS: EC2, S3, ECR, Lambda, CloudFront. Docker, Docker Compose and Docker Swarm. CI/CD pipelines with GitHub Actions. Linux (Ubuntu), Nginx, GHCR and ECR.

Databases: PostgreSQL, MySQL/MariaDB, SQL Server, MongoDB. Schema design, queries and optimization. TypeORM.

Frontend: Angular, Vue 2/3, React (fundamentals). HTML, CSS, SPA components, complex forms, data tables and real-time API consumption.

Other: Python for automation. Git and GitHub, Scrum, UML, production troubleshooting. Daily use of Claude Code as a development tool.

PROFESSIONAL EXPERIENCE

Full Stack Engineer — Mia Advanced Systems

Remote (Spain) | Aug 2022 – May 2026

- Built most of a self-service certificate generation system: developed the API, initially in .NET and later migrated to NestJS, with queue-based processing using RabbitMQ. The system receives the request, queues it, consumes an external API, generates the documents, updates statuses in the database, packages them encrypted and delivers them. Delivery went from several days of manual handling to immediate processing.
- Designed and implemented the team's CI/CD pipelines with GitHub Actions and Docker, cutting deployment time from around 20 manual minutes to about 5 automated ones and removing manual steps and related errors.
- Built and maintained NestJS and TypeScript services: REST API design, data validation and inter-service communication across multiple environments.
- Deployed and managed AWS services (EC2, S3, ECR, Lambda, CloudFront) and configured development and production environments, both cloud and on-premise.
- Delivered end-to-end features with NestJS backends and Angular/Vue frontends: complex forms, data tables, filtering and real-time API consumption.
- Acted as the team's technical reference: architecture decisions, code reviews, mentoring of more junior developers and resolution of critical production incidents.

Software Solutions Engineer — Interactivo Contact Center

Bogotá, Colombia (hybrid) | Jul 2019 – Aug 2022

- Delivered full stack applications with Node.js and Express aligned with business requirements.
- Integrated and consumed REST APIs with internal systems and CRM platforms, with error handling, authentication flows and data transformation layers.
- Identified performance bottlenecks through profiling and applied query optimization, caching strategies and architectural improvements.
- Performed functional and integration testing alongside the QA team to ensure production stability.

Junior Developer — Grupo Meiko

Bogotá, Colombia | Feb 2018 – May 2019

- Developed modules and dynamic interfaces for the corporate website.

- Introduced Docker to standardize local development environments, improving team consistency and reducing environment-related errors.
- Built KPI dashboards and visualizations in QlikView and supported data loading processes.

EDUCATION

Postgraduate Specialization in Strategic Data Analytics — Fundación Universitaria Konrad Lorenz, 2022

B.S. Systems and Computer Engineering — Universidad Católica de Colombia, 2020

CERTIFICATIONS

Backend with NestJS · NestJS: TypeORM, Swagger and Deploy · TypeScript & Node.js Fundamentals · Docker: Course and Fundamentals · Professional Git & GitHub · AI Tools for Developers · Vue.js Fundamentals · Scrum Fundamentals Certified.

LANGUAGES

Spanish: native. English: intermediate reading and technical comprehension; conversational fluency actively improving.
